

A seasoned Big Data Consultant with a Master's in Computer Science from the University of Bonn specializes in developing and optimizing data-driven solutions using various tools like Apache Spark, AWS, Azure, Databricks, and Python. The candidate has certifications in AWS Solutions Architecture, Machine Learning, and Scrum Master I. They have worked as a Data Engineer for a leading drink manufacturer, implementing edge solutions to recognize branded vs foreign bottles using camera, RFID, and app integration, and at a vehicle manufacturer as a Superset developer. The candidate also has experience in data engineering roles at multiple companies, including automating data preparation workflows, creating data pipelines, enabling ETL jobs, preprocessing and structuring data for analysis, and migrating data workflows to Spark/Scala scripts. Fluent in English and German with native Hindi skills, the candidate aims to continue using their analytical skills and technical expertise to help organizations make informed decisions using big data.
